November Webcast
Salt and Stormwater:
The Salinization of Our Watersheds

The increase in sodium and chloride concentrations in fresh water in the United States is a major cause for concern. Salinization is degrading habitat for aquatic organisms and impacting large supplies of drinking water throughout the country.

This webcast will look at some of the latest research on sodium and chlorides and explore ways to reduce its impact on our local aquatic ecosystems.

Wednesday, November 20
12:00 - 1:30pm

Kane County Government Center
Building A—1st Floor Auditorium

Hosted by: Clean Water for Kane

Please RSVP to Jessica Mino, with Kane County’s Division of Environmental and Water Resources, at minojessica@co.kane.il.us or (630) 208-8665 by November 19th if you plan to attend.
